Oncoupe

Description

Oncoupe (Wecut) is a non-destructive video editor having the ability to make simple changes to video files without transcoding them.

Here's a list of the features offered by Oncoupe :

- cutting
- splitting
- joining (video files must have the same resolution and encoding parameters)
- cropping
- rotating
- flipping
- muxing
- demuxing

Usage

This is a test to see how GitHub works so this is not a functional application.
